

## FlexiGlide **Vision Air** sliding folding security shutter

A tough, open style shutter that provides a high level of security while keeping a sense of open space.

The Vision Air sliding folding grille combines good airflow and visibility with excellent security. The panels in the curtain have evenly spaced round holes 5mm in diameter, or 6mm x 32mm rectangular slots in evenly spaced columns and staggered rows. When lit from behind these create an attractive transparent effect.

- Good airflow
- Highly secure sliding folding shutter
- Becomes transparent when lit from behind
