

FlexiGlide **Vision Glass** sliding folding security shutter

Clear 3mm polycarbonate glass inserts (tempered glass is also available) give an unobstructed view. At the same time they provide a protective barrier against theft and intrusion.

The Vision Glass sliding folding shutter combines excellent visibility with a very good level of security. The FlexiGlide Vision Glass consists of heavy duty aluminium panels with strong polycarbonate glazing. It's available in virtually any finish.

- Excellent visibility
- Highly secure sliding folding shutter
- Polycarbonate is virtually unbreakable

Finishes

Standard finishes clear anodised, painted white, black, or bronze. Optional in any RAL colour (subject to availability).

Weight

- 12.3 kg/square metre for polycarbonate option
- 12.5 kg/square metre for tempered glass option
